

Milk Deep Cleaning

F11 Daily Cleaning – 2-5 minute milk sanitization

For use on Automatic Milk Frothers

1. To fill dosing chamber, loosen cap and squeeze bottle. Mix solution of 1 oz Rinza® Acid Formulation per 500ml water. Insert suction tube into solution.
2. Press and hold Program button. Select **Service Menu**, enter password 1609, select milk deep cleaning. Select ok and follow on screen instructions (2-5minute)
3. Once cleaning solution is empty machine will require clean water to complete the rinse. Empty any cleaning solution and refill with fresh water. Press continue to perform the rinse.
4. Empty and dry waste and grinds bin. Place Tubing in drip tray rinsing port (hole in the drip tray for the tubing).
